Education

Washington University in St. Louis August 2022 – May 2027
Sam Fox School of Design & Visual Arts
Candidate for BFA in Communication Design, Minor in Human-Computer Interaction
GPA 3.96 / 4.0

Experience

HCI Design Research Assistant October 2026 – Present
Washington University in St. Louis, MO

- Design generative bio-data visualization and prototype visual interface for funded wearable technology research projects under Prof. Bei Hu.

AI Product Design Intern (Year-long) May 2026 – Present
Schneider Electric, Beijing, China

- Built a web-based prototype demo (agentic factory management) from scratch using an AI-native development workflow, presented live with physical robots at Schneider's pavilion at the World Artificial Intelligence Conference (WAIC) in Shanghai and across 9 internal demos; now in official product development.
- Delivered production-level web UI design for a factory energy-monitoring platform, working with the UX team to raise an AI-generated prototype to the company's design system standard.

Academic Mentor, Human-Computer Interaction July 2024 – August 2025
Tech X Academy, Shanghai, China

- Taught introductory workshops and developed curriculum on creative coding, UI / UX and Figma fundamentals to highschool and college level students. Mentored hackathon teams on web design projects, securing 1st place win among 100+ competing teams.

Design Lead January 2024 – June 2024
DePHY, Mountain View, CA

- Directed initial brand identity, web landing pages, and conference collateral in collaboration with founders and developers, driving social growth to 24K+ followers on Twitter/X.
- Designed industrial-grade crypto hardware prototypes, packaging systems, and user manuals, managing vendor communications with factories from sampling through production.

Co-Founder & UI / UX Designer January 2023 – December 2023
Dino Labs, Palo Alto, CA

- Worked with full-stack developers to design responsive, high-fi prototypes, design systems, and branding for multiple iterations of event platform dino.live, driving 5K+ visits and 1K+ user sign-ups in the first month.
- Created promotional assets for events such as Stanford Blockchain Conference, boosting social engagement by 3K+ Twitter followers.
- Contributed to securing $100K in grants from MiraclePlus (formerly YC China).

Projects

Contract Web Designer & Developer Feburary 2026 – May 2026
HOUR Studio, Chicago, IL

- Architected a scalable design system for the studio's website and refactored the legacy codebase into modular, semantic components, reducing style redundancy and streamlining maintainability.

UI / UX Designer & Developer October 2025 - April 2026
WashU Humanities Digital Workshop, St. Louis, MO

- Redesigned the Gender Violence Database UI and visual identity from the ground up, restructuring information architecture to improve content discoverability and drive an increase in average session duration by 65%.
- Built the custom front-end interface leveraging AI-assisted workflows and partnered with engineers to migrate the code into the production Vue environment.

Awards

Communication Arts 2027 Interactive Annual, Award of Excellence (Student Work)

Award360° 2026, Shortlisted Finalist

Core77 Design Awards 2026, Student Winner (Interaction Design) & Student Notable Honoree (Speculative Design)

Skills

Figma, Adobe Creative Suite (Photoshop, Illustrator, Indesign, Premiere), Final Cut Pro, Procreate, Blender, Cavalry, Unity, TouchDesigner, Shapr3D; HTML, CSS, JavaScript (Processing, p5.js, GSAP, three.js); AI-assisted workflow: Claude Code, Codex, Cursor
